The System enables the product's brand managers to create and manage a database of UPN/TM/PD/URL links to create a desired brand image for each product. The system enables manufacturers, retailers, and their agents to deploy Java-enabled multi-mode type virtual kiosks along any Web-enabled consumer touchpoint. The system also enables manufacturers, retailers, and their agents to display advertisement and promotional spots on subnetworks of deployed virtual kiosks, as well as menus of UPN/TM/PD/URL links to brand-building information content about such consumer products.--
